

# MASTER CLUES

Only math toppers and deep thinkers can solve this!

## About App?

App consist of total 70 levels, divided into 2 categories, one is Number pro (consist of 50 levels). And 50 levels further divided into 3 categories as two digits number guessing, three digits number guessing, four digits number guessing. Remaining 20 levels are in expert level. And the app concept is guessing a number with the given clues. There are 3 to 4 clues for each level and that clues gives a number.

## Why this app?

This app improves Your Thinking levels, math skills. Because this app is totally based on thinking levels, after completing all level, users can solve any math problems in an easy way.

## Create new option:

This option makes your ideas fulfill, that means generally after completing all levels you may feel bore and you may wish to have more levels, and of course there is an update of levels after few days. But in this app, we will give that chance to you. As you click on 'create new' option, there are two inputs given, in 1<sup>st</sup> one you should enter your answer, and in second input you should enter your 3 or 4 clues which satisfies your answer, after clicking on 'post' button you are directed to mail and there you should send your ideas of next level, it will be reached to our app mail. And all questions which you send are not updated, only the selected questions are uploaded.

## Rewards:

The user who completes all levels, will be certified as math expert and logical guru from our app.
